Our toys span four key areas:

Microscopic & Science, Astronomy, Human Anatomy & Health, and Historical & Natural Discovery.

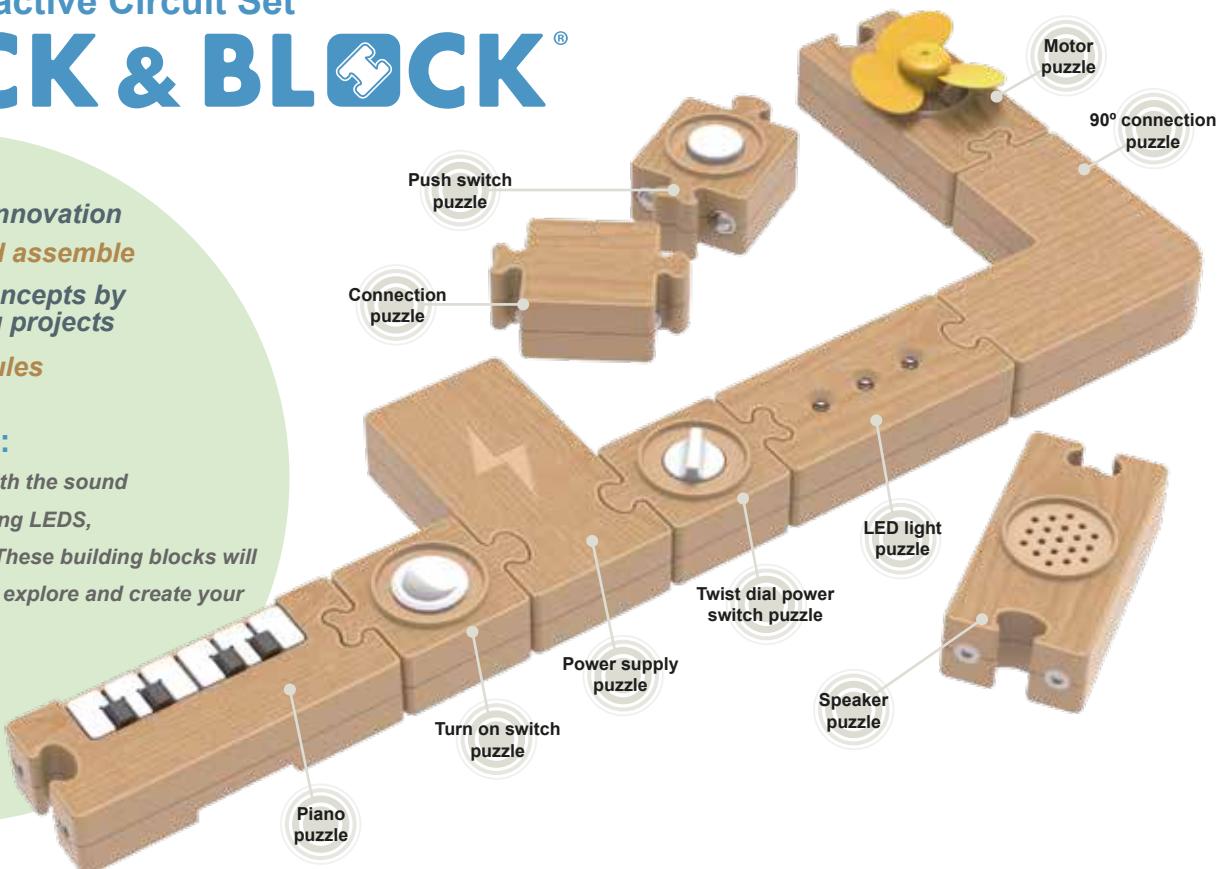

My First Interactive Circuit Set

- ★ Safety through innovation
- ★ Easy snap and assemble
- ★ Create circuit concepts by building exciting projects
- ★ Portable modules

Expansion Modules:

Expand your own modules with the sound of music, buzzing fan, sparkling LEDs, crazy noise and much more. These building blocks will stimulate your senses as you explore and create your own Block & Block!

more than toys,
a smart start for future minds.

Designed for ages 6-10+, WILD! Science activity kits turn real science into hands-on fun. We help children build imagination, creativity, and problem-solving while they experiment safely at home or in class.

Each kit includes clear, picture-led guides, real lab tools, and safe ingredients that deliver visible results. Kids learn new skills, understand the natural world, and enjoy the process from first setup to final outcome.

**WILD! Science kits inspire, educate, and entertain –
an investment in your child's curiosity.**

Authentic STEM Experiences

Hands-on activities designed with real science principles and tools.

Engaging, Child-Friendly Learning

Fully illustrated instructions that make science easy to follow and fun to explore.

Expert Development & Quality Manufacturing

Created by a dedicated R&D and design team using high-grade materials.

Trusted, Safe & Globally Compliant

Products meet international safety standards and are trusted by educators and retailers worldwide.

EDIBLE SCIENCE

TT007

BUBBLE TEA & GUMMIES EDIBLE SCIENCE KIT

Are you ready to cook up some tasty science? This kit includes ingredients to make mango gummies, sour grape gummies, brown sugar tapioca pearls, and delicious Assam milk tea. Mix up the instant Assam milk tea, pop in some bubble pearls, and use the included straws to enjoy a fun bubble tea treat.

Product Size: 26.5 x 30.5 x 7.0 cm

6+

TT047

BUBBLE & POPPING KITCHEN

Make your own colourful bubble pearls and popping pearls bursting with flavour! This kit includes ingredients to make 2 types of tapioca bubble pearls (brown sugar and bubble gum) and 1 type of popping pearls (mango). Enjoy the pearls in the included Assam milk tea or pink lemonade or add them to your favourite fruit juice or dessert for a delicious DIY treat!

Product Size: 26.7 x 26.7 x 6.5 cm

TT070 GUMMY KITCHEN

Are you ready for some super sweet science? This kit includes ingredients to make gummies in 3 delicious flavours: cherry, lime, and mango.

Product Size: 26.7 x 26.7 x 6.5 cm

6+

TT046 SOUR GUMMIES KITCHEN

Are you ready for some mouth-twisting and mind-bending science? This kit includes ingredients to make super sour gummies in 3 delicious flavours: cherry, grape, and lime.

Product Size: 26.7 x 26.7 x 6.5 cm

6+

TT006
GOO & CHEW LAB
EDIBLE SCIENCE

Can you find the perfect edible slime? Use physical and chemical changes to turn special ingredients into amazingly stretchy slime. Make tasty sour slime, fruit juice slime, and chocolate slime. There are ingredients included in the kit to make lots of different types of slime.

Product Size: 26.7 x 26.7 x 6.5 cm

TT004

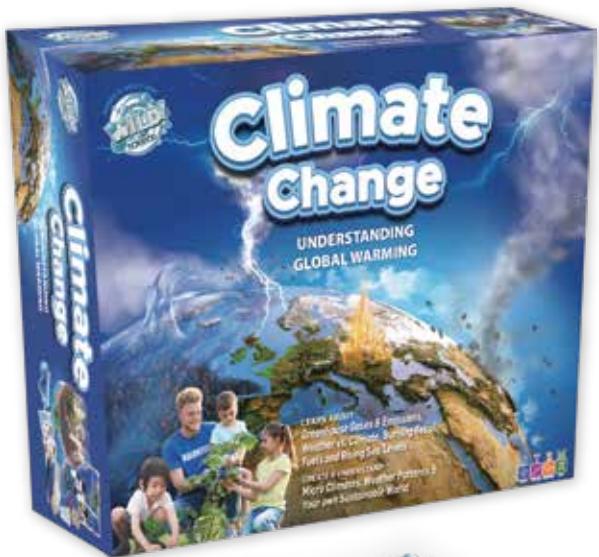

GLOW-IN-THE-DARK Rainbow Volcano Lava Lab

The Rainbow Volcano Lava Lab uses CREATIVE Chemistry and CREATIVE Physics to explore Geology and Art! The UNIQUE reusable Volcano Island has 4 craters and 11 calderas that produce a STUNNING variety of colourful visual effects and AMAZINGLY REALISTIC lava flows that Glow brightly in the Dark. Design Colour Morphing Chroma Flowers, create swirling Colour Storms in a special lake... and so much more.

Product Size: 38.7 x 32.0 x 7.0 cm

8+

TT039

CLIMATE CHANGE UNDERSTANDING GLOBAL WARMING

The 'CLIMATE CHANGE' kit makes sense of global weather systems and the impact of human activity. It works just like our planet and even looks like it.

Use real apparatus to conduct scientific experiments that will startle, thrill and amaze you. Grow and eat your own crops, irrigate a desert, create rainfall and see if you can save your real ice glaciers! Watch oceans rising, create and measure winds, measure carbon dioxide and acid emissions. Feel the greenhouse effect. Float icebergs and monitor ocean currents as they melt. And much much more...

Product Size: 38.6 x 31.9 x 11.6 cm

MEGA SCIENCE KITS

8+

TT023

CRYSTAL GROWING CAVES & GEODES CHEMICAL KIT

Get ready to travel down to the dark and silent world of underground caves. You will discover bizarre rock formations, glistening geodes, and create a cave full of crystals. Grow sparkling crystals on plaster shapes, make your own glistening geodes, and create a crystal column. Try growing a jumbo-sized crystal and follow the steps to discover the crystals in your own kitchen. Keep your creations safe in a stalactite cave display case.

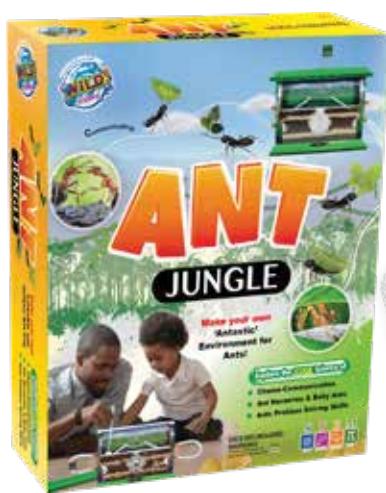

Product Size: 38.7 x 32.0 x 7.0 cm

ANTS & WORMS

My First
Recycling Game

HKSDA 2022
SILVER
CORPORATE

Each day we produce wastes. Many of them are recyclable and are valuable resources. This is a **cooperative game**. Your mission is to pick up wastes from different places and recycle them!

Collect and recycle as many waste tokens as possible.

If players recycled all waste tokens before the landfill is full, then the game ends. You've helped the community to recycle valuable resources. All players win! Congratulations!

If there are 8 tokens in the landfill, the game ends and the recycle mission fails.

Reuse

CHR1S®

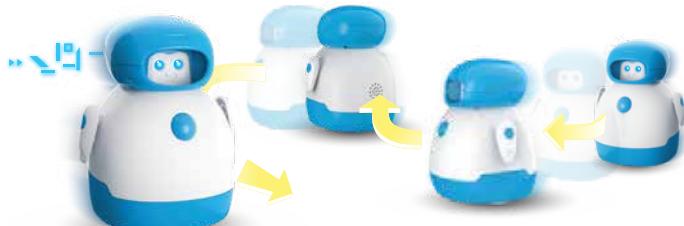

Coding Home Robot 1st Set

STEM
Learning

Problem Solving

Logical Thinking

Sequence

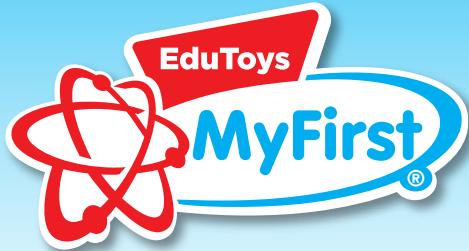

* These are promotional pictures.
The actual product must only be used at home on a flat, dry and smooth surface.

CHR1S is the first coding robot designed for children age 3+.

CHR1S teaches children **the basics of coding**, while **incorporating problem-solving** and **creativity**.

Children will be delighted to see their coding skills bring **CHR1S** to life and keep company, as **CHR1S** navigates his surroundings.

You can even use the coding blocks to create your own custom path for **CHR1S**. There are endless possibilities for family fun!

My First DIY
LED Greenhouse

This incredible miniature greenhouse is a functional starter for everyone. A great all-around expandable greenhouse ideal for planting small flowers while learning how to care for plants; how's photosynthesis affecting our daily lives. How to create photosynthesis for indoor greenhouse?

BL158 8+

Water Filtration Kit

Water goes on quite a journey to reach our taps, safe and ready to drink. One of the many important steps in the process is filtration, which uses layers to sift sediments out of the water.

The kit here introduces how water gets cleaned by building a simple filtration system and more.....

CM055 8+

THE TENGY TOWER

Use Only
WIRES
For Support!

GM342 6+

Seemingly defying gravity, this structure can be built one layer on top of another, with just strings and loose parts. But, what's really going on here?

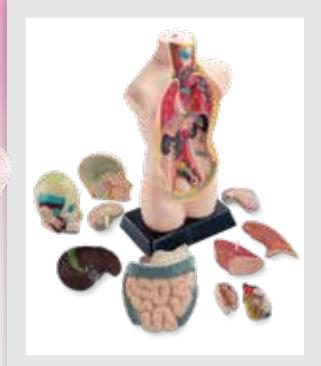

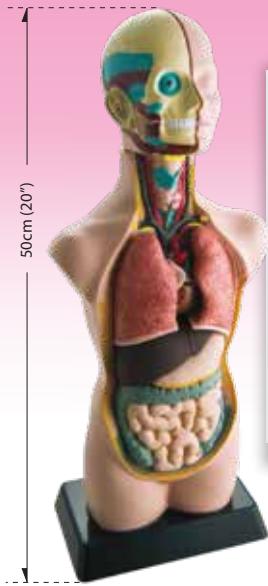

This is built using a structural principle called tensional integrity (TENSEGRITY for short), where all the strings are under tension due to the distribution of mass in the system.

Space Science

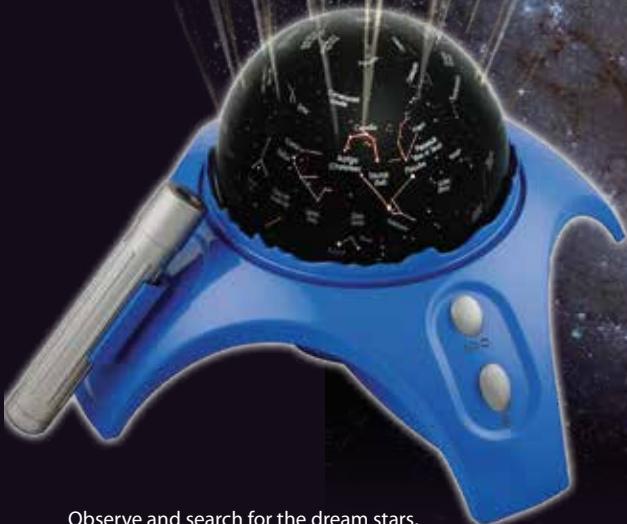

CyberSky is an entertaining, and educational astronomy program that transforms your personal computer into your personal planetarium.

CyberSky provides an excellent way to learn about astronomy and to explore the wonders of the sky visible in the distant past, the present, and the far off future. It displays accurate charts of the sky as seen from any location on the earth.

Sky charts can include stars, constellations, deep sky objects, and solar system objects, and can be enhanced by the addition of labels, coordinate system grids, and reference lines.

CyberSky Program

Observe and search for the dream stars, planets and constellations in the comfort of your home.

Da Vinci Inventions

Leonardo Da Vinci

(1452 – 1519)

Artist, scientist, inventor, and archetypal Renaissance man, Leonardo da Vinci, offered the world glimpses of the distant future through his awe-inspiring designs. His limitless curiosity was the impetus for his pursuit of creativity and genius.

DV002 8+

The Aerial Screw

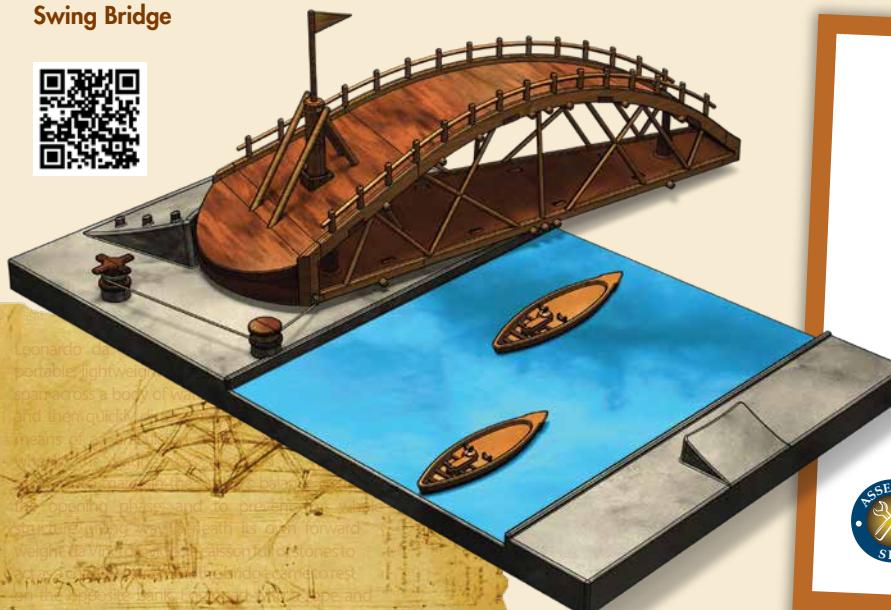

The Aerial Screw designed by Leonardo da

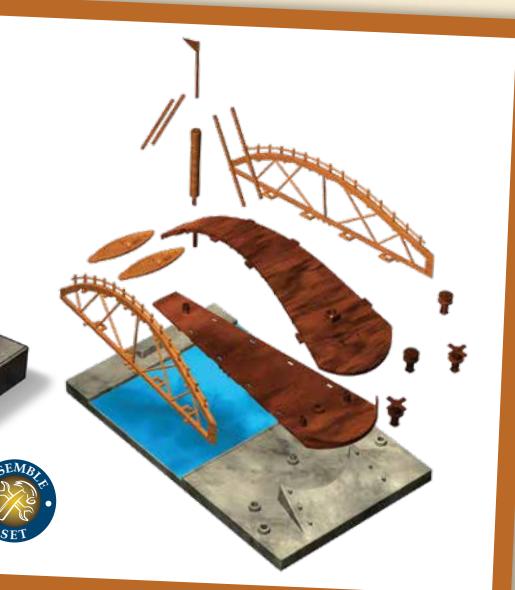

DV003 8+

Swing Bridge

Leonardo da Vinci's swing bridge was a portable, lightweight structure designed to span across a body of water. It could be transported and then quickly deployed to provide a temporary means of crossing. The bridge was built using a wooden deck supported by a central pivot, which was mounted on a boat-like hull. The bridge was designed to be easily transported and assembled. It was intended to be used in situations where a permanent bridge was not feasible or practical. The bridge was also designed to be able to withstand strong winds and waves, making it a reliable and safe crossing option.

DV017 8+
Multiple Sling

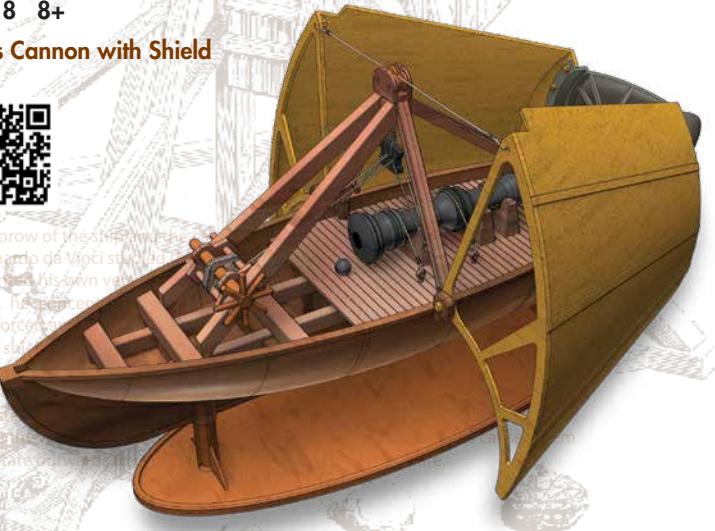

Leonardo da Vinci's idea was to build a machine that could throw eight large projectiles at once. The machine was positioned in a long arms and had a jumbo range of throwing a projectile. This kind of a field, where weapons developed to be more powerful, was common in the 15th century. It meant creating more powerful weapons with more power, without the need to use unfamiliar materials. They were more potent and powerful, but they were also more

DV018 8+
Ship's Cannon with Shield

The prow of the ship was the most vulnerable part. Leonardo da Vinci studied this problem and invented his own version. First, he strengthened the hull and reinforced the stern. The ship was built with a large amount of the hull. Once the ship was built, it was able to rotate sideways.
